

OBJECTIVE:

Motivated Computer Systems Engineer and Front-End Developer with a strong foundation in modern web and mobile technologies. Skilled in ReactJS & React native, with hands-on experience in building full-stack applications. Seeking a challenging Front-End or Full-Stack role where I can leverage my expertise in React/React Native to develop scalable, user-centric applications and contribute immediately to innovative, agile teams.

EXPERIENCE:

aba agency

Sep 2025 - present

React Native Developer

- Developed and maintained a role-based, multi-department mobile application using React Native (Expo) for internal company operations.
- Implemented department-specific business logic and dynamic UI rendering for HR, Management, Printing, Events, Design, and Marketing departments.
- Built an employee attendance tracking system enabling users to start/end work sessions, store daily attendance records, and review work history.
- Contributed to a shared Calendar module featuring Meetings and Tasks management with date-based filtering and detailed views.
- Developed a Settings module supporting multi-theme UI (Light, Dark, Dreamy) and multi-language support (Arabic, English).
- Implemented drawer-based navigation to improve user flow and accessibility across app features.
- Worked with an active user base of 70–100 employees, ensuring performance, scalability, and reliability.
- Followed clean architecture principles, reusable components, custom hooks, and context-based state management.
- Collaborated with cross-functional teams in an Agile environment, contributing to a scalable app designed as a reusable template for future clients.

GolfSnap

Feb 2025 - Oct 2025

React Native Developer & ReactJS Web Developer

- Developed a cross-platform mobile app (iOS/Android) using React Native (Expo SDK 54) and React 19, helping golfers connect, organize games, track scores, and share experiences.
- Participated in building a role-based admin portal using React 18, TypeScript, and Vite, featuring four distinct dashboards (Super Admin, Club Owner, Player) with protected routes and automatic portal-type redirection.
- Implemented a Role & Permission management system with dynamic role creation, granular permission assignment, and user-role mapping — enabling fine-grained access control across the platform.

- Developed a User Management module with paginated listings, multi-criteria filtering (email, name, phone, game type, privacy, location radius), sorting, and full CRUD operations.
- Built a Club & Course administration system allowing club creation, multi-owner assignment, course/tee configuration with hole-by-hole data (par, yards, slope rating, stroke index), and default tee settings.
- Architected a custom API client layer with a custom hook and HOC pattern, unifying many domain modules under a single authentication and error-handling pipeline.
- Built a real-time chat system using SignalR for live messaging, including message editing, deletion, read receipts, and unread conversation counts.
- Created reusable custom hooks for analytics tracking with batched event flushing, GPS location with reverse geocoding, profile image batch-fetching with caching, native calendar integration, and contact-based player invitations
- Built the full game lifecycle flow end-to-end: game creation, player invitations, join requests, check-in/no-show, live scoring, score disputes, and scorecard generation (PDF/image with digital signatures).
- Designed a Context API state management architecture with UserContextProvider (auth, user data, tokens) and AppContextProvider (theming, navigation state) for centralized, prop-free data flow across the app.
- Integrated Firebase Analytics, push notifications via Expo Push Tokens, and deep linking (golfsnap://) for game invitations and password reset flows.
- Participated in weekly client meetings in an Agile environment, translating Figma MVP designs into production-ready screens and proposing UX improvements.

Freelancer at Staffready Mablewood

Jun 2023 - Feb 2024

Front-End ReactJS Developer

- Worked on rewriting an existing project using ReactJS and the Material UI library to enhance the user interface and deliver a more modern, user-friendly experience. Introduced visually appealing features and improved usability.
- Gained hands-on experience with Jira and Slack, effectively collaborating with team members and managing project tasks in a professional development environment.
- Expanded proficiency in GitHub by contributing to collaborative projects, handling version control, and participating in code reviews.
- Worked as a React Native developer on a mobile app project, adapting and optimizing a previous web application for mobile platforms.

IConnect Technologies

Mar 2023 - Jun 2023

Full-Stack (ASP. Net web API & Angular) Intern

Firstly, I learned more about SQL and databases, and then we started with front-end development by learning the Angular framework and its basics. Finally, I had Learned dotnet, and its Entity Framework Core, and how I can build an API that has the desired data and a spicific features like: DTO, Sessions, Micro services. To combine the front-end and back-end to have a full-stack project ready to be deployed.

EDUCATION:

- **Bachelor's degree** Nov 2018 - Mar 2024

Computer system engineer

Arab American University

Graduation project:

Medical half-automated system for injectable drugs.

- **High School (Tawjihi)** 2017-2018

Asira al-Qibliya secondary school

TECHNICAL SKILLS:

- **Programming Languages:** C#, Python, Java, JavaScript, Typescript.
 - **Databases:** SQL server, Oracle, PL/SQL
 - **Web & Mobile programming:** HTML, CSS, ReactJS, React Native, Flutter, Angular, ASP. Net web API
 - **Software Packages:** MS-Office (MS Word, MS Excel, MS PowerPoint)
 - **Other Technologies:** LINUX, Bootstrap, Material UI, Git and Github.
-

SKILLS:

- Able to create SPA projects with ReactJS.
 - Comfortable with the responsive design creation.
 - Ability to learn new technology.
 - Time management.
 - Teamwork Skills.
 - Problem Solving.
 - Team Leadership.
-

TRAINING PROJECTS:

- **Sho3lat-Fikr website .Net Core MVC**

As a member and an admin in the Sho3lat-Fikr club, I have worked on this website to make it a descriptor of itself.

Used technologies: C#, HTML& Bootstrap.

- **Sign-Up pages**

It's a design of Log in & sign-up sections, implemented using ReactJS tech as a practice on it.

- **SHERTEE clothes factory - Software Engineering.**

- **GYM web site - ReactJS**

A project was developed as a practice in the React framework.

Used technologies: ReactJS

- **My ReactJS portfolio**

That's the latest version of my Portfolio, It's developed using ReactJS with React hooks, With a good clean code& Responsive design.

- **Smart house - Engineering project management.**

PS: All of my training projects can be found in my portfolio or GitHub profile.
